Eriez® Introduces Live, Real-time, Online X-Ray Product Testing

Eriez®, world authority in magnetic, vibratory and inspection applications, now offers a way for customers to view the performance of an [Eriez X-Ray](#) machine live online. This eliminates the need for an on-site facility visit, saving time and money.

Customers will “virtually” attend the material test in real time with Eriez’ interactive online X-Ray testing via a password-protected Web site. Participants will see their products passing through an Eriez E-Z Tec® X-Ray Inspection System to determine its performance for foreign object detection, mass, fill level or missing items. Multiple viewers can watch from different locations and ask questions live to Eriez’ test personnel.

“We receive products sent from all over the world, along with contaminants the customers want tested,” says Ray Spurgeon, Eriez Product Manager—Inspection Systems. “The online testing precludes the need for our prospects to be physically present at our facility to see actual tests. The resolution on the computer screen as we conduct the live testing has the same clarity as if you were actually at the Eriez testing facility.”

Eriez is the only manufacturer to offer online X-Ray testing, according to Spurgeon. “Depending upon the customer’s application, we will test as many foreign objects as required to give our customers the level of comfort they deserve before purchasing the X-Ray equipment.”

Eriez E-Z Tec X-Ray Inspection Systems use advanced linear array technology that is unrivalled in the industry for its sensitivity, speed and sophistication. X-Ray systems monitor product and package attributes such count, mass, fill level, fat analysis, broken or damaged product, as well as detecting unwanted metals, stone, glass, bone and some plastics. Eriez also produces a complete line of Metal Detectors.

For more information about Eriez’ Online X-Ray Testing, call (888) 300-ERIEZ (3743) or send an e-mail to eriez@eriez.com.

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through ten international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send e-mail to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
